We're big on data

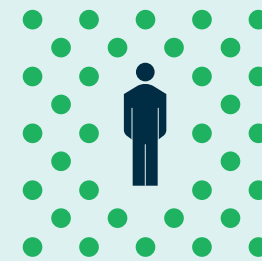

We know audiences because we have the (right) data.

Through Audience One, we can fuel your campaigns with viewing data, so we know when and where audiences are watching. Activating our robust, privacy-compliant 1st and 3rd-party data helps optimize performance, informs future campaign strategies, and delivers a demonstrable ROI across the Audience One platform.

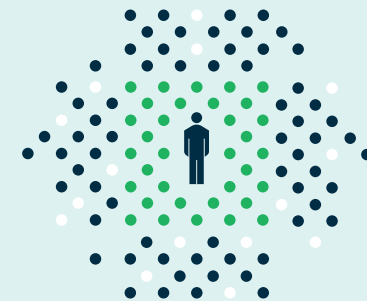

The data journey begins with us...

Our rich, proprietary data consists of set-top box data with granular audience tuning metrics that drive detailed analyses of viewing behavior. These insights are captured in real time from subscribers' set-top boxes and can provide us with subscriber info, audience insights, and household attributes.

...and continues with the ability to add client data...

We are then able to layer on additional pieces like online activity or location data to build a more accurate consumer profile.

...and/or 3rd-party partner data.

We work with industry leaders including Experian, LiveRamp, Medicx, Shopcom, Nielsen (and more) to finally create a three-dimensional view of your target audience.

HOW WE USE CUSTOMER DATA:

Find

your audiences using data which provides anonymized insights on geography, demographics, and psychographics (viewing trends, hobbies, purchase behaviors, and brand preferences, to name a few).

Target

them on the right platform, on the right screen, and at the right times.

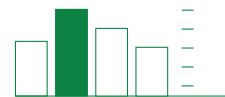

Deliver

ads with custom, relevant messaging for the biggest impact.

Report: Performance & Attribution

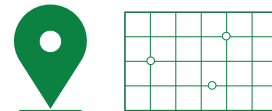

With NYI's post-campaign analytics, gain deeper insights on the impact of your multi-platform media campaign with standard and custom conversion analytics from all three major media partners.

Post-campaign analytics

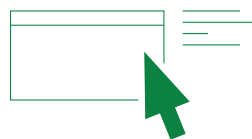

Sales Conversion

ROI using conversion data against campaign exposure.

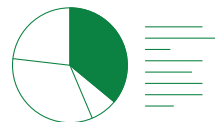

Location Data

Household audiences exposed to a commercial who then cross the threshold of a location.

Website Visitation

Household audiences exposed to the commercial who then visited the website.

Brand Health Study

A custom survey that measures the campaign's effectiveness in raising total awareness, familiarity and consideration among the target audience.

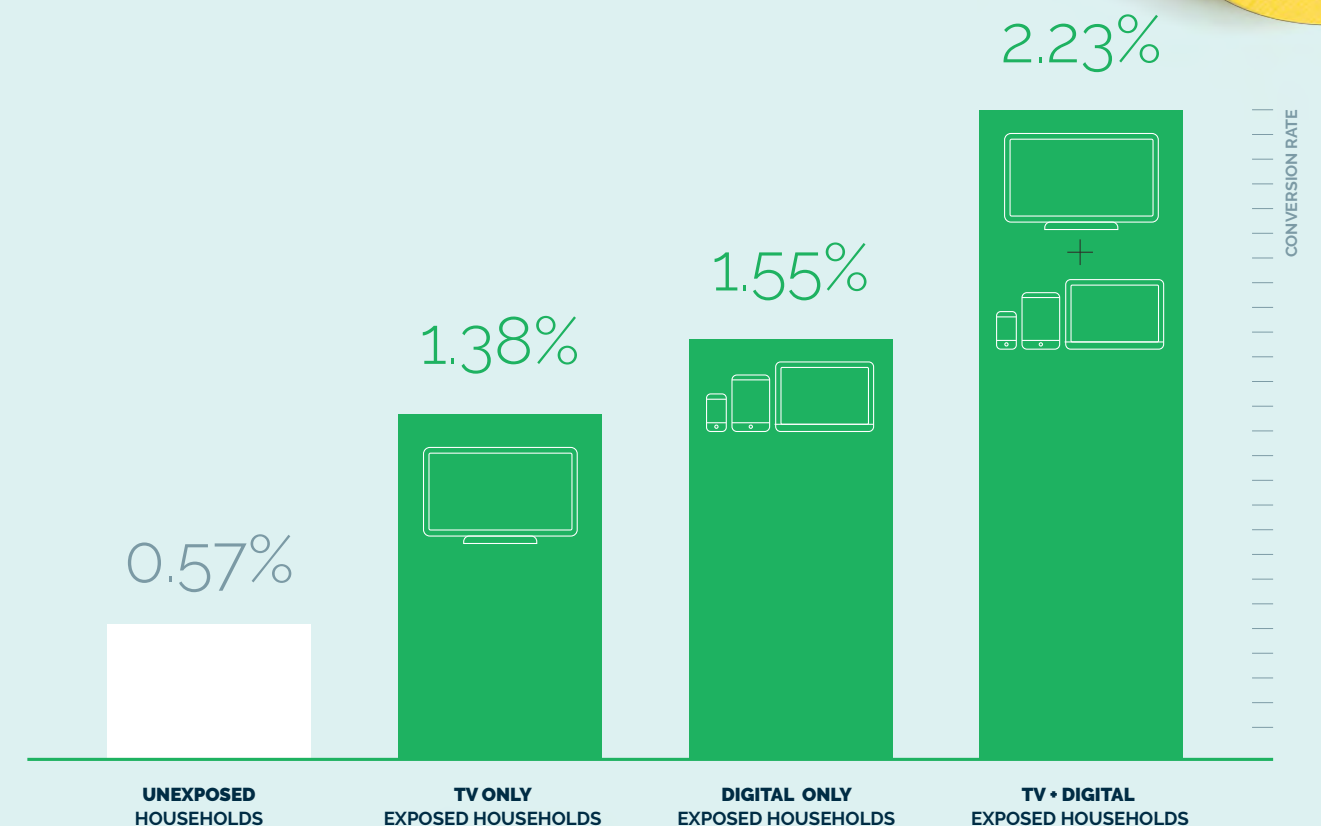

Tune-In Conversion

Household audiences exposed to a show's tune-in spot who then viewed the program.
